

Annex no. 1 – Award application*

1. Candidate

Name: Costache

Previous name (if applicable):

First Name: Romulus-Dumitru

PhD graduate since (year) (a copy of the doctor's degree or equivalent is presented): 2017

Position occupied: Project Director (Scientific Researcher)

Institution: Universitatea Transilvania din Brașov, Bulevardul Eroilor 29, Brașov 500036

Mobile phone: .

Email address:

2. Edition “Gala Cercetării Românești”: 2024

3. Award and category for which you apply (individual or research team): Award: *Earth, environment and climate change sciences – Award “Grigore Cobălcescu”*; Categoria: *individual*

4. Team leader, if applicable: -

5. Research team structure, if applicable (names of team members, position held, year of last degree awarded):-

6. A description of the most important scientific achievements of the last 5 years (max. 4 pages, A4 format, Times New Roman characters, 12 points, 1.5 line spacing and 2 cm margins).**

In recent years, studies in which advanced artificial intelligence techniques are used in various scientific fields have increased significantly in number. In this context, Dr. Romulus-Dumitru Costache (candidate) is one of the leading researchers worldwide who applies these techniques in order to study susceptibility to natural hazards, mainly flash-floods and floods. This is also certified in a Review Article published by [Duan et al. \(2022\)](#) in which it is mentioned that Romulus Costache (candidate) is, at international literature level, the author who has published the most significant number of articles (in Web of Science Core Collection) focused on the assessment of flash-flood susceptibility. This information can be verified at page 7 of the above-mentioned article. It should be mentioned that candidate applied for the first time in the literature new approaches by which the susceptibility to flash floods can be determined as accurately as possible. Thus, in the article [Costache \(2019\)](#), P.L. proceed for the first time in the literature to the inventory of areas with torrential phenomena, in polygon format, to define the dependent variable in the case of calculating the flash-flood susceptibility, compared to previous studies that used as the dependent variable locations that were affected by flash floods in GIS vector point format. This article, published in [Science of The](#)

Total Environment journal (mentioned 1st in the list from section B2), received a relatively high attention from international researchers being cited by 52 times (excluding self-citations). During several months, in the last years, this article was included in Highly Cited Papers category (Top 1%) in Web of Science Core Collection. Next, another new approach proposed by the candidate in the case of the study flash-flood susceptibility study, it is the application, in addition to the machine learning techniques, of the Flow Accumulation method to calculate the degree of torrentiality of the areas that were in the immediate vicinity of the slopes with a high susceptibility to flash floods. This new approach was highlighted in two articles published by candidate ([Costache et al., 2019, 2022a](#)) in journals from Q1 (**CATENA**) or Q2 (**Geocarto International**) according to AIS. The article published in CATENA journal (mentioned in the 9th position in the list from section B2) received 32 citations (excluding self-citations). At the same time, in the 2 articles previously mentioned and published in 2019, models resulting from the combination of the following algorithms were used for the first time in the literature in order to determine the susceptibility to flash floods: i) Support Vector Machine and Logistic Regression one the one hand with Frequency Ratio and Weights of Evidence on the other hand; ii) Artificial Neural Network and Naive Bayes on the one hand with Certainty Factor and Evidential Belief Function on the other hand. Moreover, among the multiple articles where the P.L. proposed new combined algorithms for flash-flood susceptibility assessment can be remarked the paper published in Journal of Hydrology in 2022 ([Costache et al., 2022b](#)) mentioned at position 8th in the list from B2 section. In this scientific article the **candidate** used for the first time the H2O R package to apply the Deep Learning Neural Network in combination with multicriteria decision making models. This article received very fast the attention of researchers, currently having 23 citations (without self-citations) and being in this moment a *Highly Cited paper – Included in the Top 1% of the academic field of Engineering according to Web of Science (Clarivate Analytics)*. It must be said that at the present time (18.07.2023) a number of 8 articles in which P.L. is first author or co-author are included in the *Top 1% most cited papers*. The applied models in P.L. articles proved to be able to estimate the flash-flood susceptibility with high accuracy, becoming benchmark techniques for susceptibility modelling to flash-floods or other natural hazards in other parts of the world. His concerns regarding the way in which the changes produced in the environment influence the characteristics of flash floods were materialized by the publication of an article in which the correlation between land use change and flash-flood susceptibility was analysed ([Costache et al., 2020](#)). It was for the first time in the literature when remote sensing techniques, GIS and artificial intelligence were used in an integrated manner to develop such an approach.

Additionally, it should be noted that according to his scientific record, **candidate** managed to coordinate in his papers published in Q1 or Q2 of WOS (according to AIS), research teams from various

countries like: Romania, Norway, Slovakia, Australia, Austria, USA, South Korea, Egypt, Iran, Vietnam, Saudi Arabia, Bangladesh, India, China or Taiwan. Moreover, it can be admitted that in the Romanian literature the applicant is the first researcher that carried out scientific articles using machine learning/AI techniques and also who successfully managed a Research Project (as Director) in which these algorithms were applied for natural hazards estimation (the Project is mentioned at **section 7 - CV section**).

Being employed also in the Flash-Flood Forecast and Warning compartment from the National Institute of Hydrology and Water Management, P. L. made the results obtained in his researches available to the institution in order to improve the procedures for developing forecasts and warnings for flash floods

7. Narrative Curriculum Vitae of the "individual" candidate or of each member of the research team, in the case of the "research team" candidate, showing the results of the research activity of the last 5 years, according to the quantitative indicators in Annex no. 2 to the regulation and qualitative assessment criteria provided in Annex no. 3 to the regulation.

Costache Romulus-Dumitru graduated in 2011 the Faculty of Geography, from the University of Bucharest, specializing in Meteorology-Hydrology. In September 2013, he graduated a Master program in Climatology-Hydrology, from the same faculty. His doctoral thesis completed between 2013 and 2016, at the “Simion Mehedinți” Doctoral School at the University of Bucharest, was entitled: *The assessment of structural vulnerability to floods and flooding in the upper and middle sector of Buzău River Basin*. The applicant has a PhD in Geography since 20.04.2017. It is worth to note that during the doctoral studies the candidate also obtained a doctoral scholarship granted by the Institute of National Economy which is part of the Romanian Academy. Within this scholarship, Costache Romulus-Dumitru elaborated another research work entitled “*Assessment of economic damages caused by floods and flooding in the upper and middle sector of Buzău River Basin*”, which was finally integrated as a chapter in the final doctoral thesis.

The candidate has the degree of Scientific Researcher at the National Institute of Hydrology and Water Management of Romania where is employed from 2015.

After he completed the doctoral studies, the candidate managed to obtain, through project competitions, a number of 3 postdoctoral fellowships awarded by the Research Institute of the University of Bucharest. The first fellowship took place between 15.06.2018 - 14.06.2019, the second one between 01.01.2020 – 31.12.2020, while the 3rd one started on 01.09.2023 and is to be completed on 31.08.2024.

Between 08.04.2021 and 31.12.2022 the candidate was Director of a Postdoctoral Project obtained through a competition organized by UEFISCDI. He received the EXCELENT degree for the results achieved during this Project.

Additionally, he was implied as member in teams of 2 international research projects (“*IS-ENES2 – Infrastructure for the European Network of Earth System Modelling* – Period: 01/02/2017 – 31/03/2017” and “*MOSES - Managing Crop Water Saving with Enterprise Services* – Period 01/09/2016 – 01/11/2018”) and in a national project related to the risk evaluation (“*Ro-Risk Project – advisory and expertise services for flood risk assessment under the Project „Assessing Disaster Risks at National Level“* – Period: 21/07.2016 – 31/12/2016”).

It should be mentioned that, in the present, the candidate is the Project Responsible on behalf of Transilvania University of Brașov (Romania) within a HORIZON EUROPE project during the period

between 01.10.2023-30.09.2027. The Grant Agreement refers to the project *MULTICARE (Multi-hazard low-carbon resilient technologies and multi-scale digital services for a future-proof, sustainable & user-centred built environment) – Project Number 10123467* that received funding *HORIZON-CL5-2022-D4-02* call, having as topic *HORIZON-CL5-2022-D4-02-01 - Designs, materials and solutions to improve resilience, preparedness & responsiveness of the built environment for climate adaptation (Built4People)*.

The candidate started his didactic career (between 22/02/2023 – 02/06/2023) as Associate Professor of Transilvania University of Brasov, Romania. He taught GIS classes on the Faculty of Civil Engineering, Master Programme (English): *Project management in urban regeneration*.

Regarding the Scientific Awards, the candidate obtained **1st place** (winner from Romania country side) at “**Danubius Young Scientist Award 2020**” – organized by Austrian Federal Ministry for Education, Science and Research (BMBFW) and the Institute for the Danube Region and Central Europe (IDM). It should be mentioned that young researchers from all fields of research participated in this competition. Also, he obtained a **Special Mention** at “**Rada Mihalcea Awards - Young Researchers in science and engineering** – 6th edition - 2020” - organized by Cluj-Napoca (Romania) city hall.

Due to his rich scientific activity the candidate was included in the **World's Top 2% Scientists by Stanford University (2022 and 2023 Release)**. In 2022, Costache Romulus-Dumitru occupied the place of 29716 among all the scientists included in this Ranking (200196 persons). According to this Ranking, the P.L. is on the **17th** position among the Romanian researchers. In 2023, Costache Romulus-Dumitru occupied the place of 11794 among all the scientists included in this Ranking. According to this Ranking, the candidate is on the **4th position** (excluding self-citations) among the Romanian researchers from all scientific domains. Moreover, according to this ranking, he occupied the **1st place** in Romania and **84th** at the global level in the field of **Geological & Geomatics Engineering**.

Overall, the candidate has a total of 71 scientific papers published as first, corresponding or co-author published in journals located in Q1 or Q2 according to AIS. The updated Curriculum Vitae along with the publication list of the candidate can be found and downloaded from the next link: <https://www.brainmap.ro/romulus-dumitru-costache>.

Currently the candidate is Academic Editor at the next 3 journals:

- **Advances in Civil Engineering** journal (Impact Factor = 1.8) included in Science Citation Index Expanded (SCIE) of Web of Science (<https://www.hindawi.com/journals/ace/editors/>).
- **International Journal of RF and Microwave Computer-Aided Engineering** journal (Impact Factor = 1.7) included in Science Citation Index Expanded (SCIE) of Web of Science (<https://www.hindawi.com/journals/ijmce/editors/>).

- Land journal (Impact Factor = 3.9) included in Science Citation Index Expanded (SCIE) of Web of Science (https://www.mdpi.com/journal/land/editors?page_no=2).

The visibility and the impact of the scientific contribution of the candidate can be estimated through several elements listed below. First of all, the share (percentage) of articles published in Q1 (red zone)/Q2 (yellow zone) journals according to AIS from the total number of published articles is equal to 62.28%. The total numbers of articles published by candidate in Q1 and Q2 is 71, while the total numbers of articles of the candidate (including also the databases – WOS-ESCI; Scopus and other international databases) is 114. The minimum value of 7 (of the articles in Q1 according to AIS) is exceeded. If is taken into account only the scientific papers published in SCIE (Science Citation Index Expanded) or SSCI (Social Science Citation Index) of Web of Science, the share will be equal to 74.73%. The number of the total publication in SCIE (Science Citation Index Expanded) or SSCI (Social Science Citation Index) of Web of Science is equal to 101 (at 09.02.2024). According to Web of Science, the total number of citations (without self-citations) of the candidate is 2966 (accessed online at 09.02.2024). According to Scopus the total number of citations (without self-citations) of the candidate is 3749 (accessed online at 09.02.2024). In case of candidate, the average of citations per publication (without self-citations), according to the Web of Science Core Collection is 24.38 (accessed online at 09.02.2024), while the average of citations per publication (without self-citations), according to the Scopus is 26.7 (accessed online at 09.02.2024). The Hirsch Index according to Web of Science is 36, while the Hirsch Index according to SCOPUS is 37.

The cumulative Article Influence Score (calculated according to ANNEX 2 of regulation) exceeds value of 5 (minimum value).

8. The list of publications of the "individual" candidate or of each member of the research team, in the case of the "research team" candidate, highlighting the relevant publications of the candidate in the last 5 years and the joint publications of the members of a research team in the case of the candidate "research team". A link to the web page where the candidate's publications can be found is also mentioned.

For almost all the publications below the DOI or the entire web page were indicated. Also, using only the DOI the web-page of the publication will be displayed.

9. List of research projects won by the candidate and their value.

- a. *The integrated analysis of flash-floods and floods susceptibility in Romania using machine learning algorithms and bivariate statistics (PN-III-P1-1.1-PD-2019-0424)*, contract No. PD 226 from 08/04/2021. Period: 01/01/2021 – 31/12/2022 (Acronym: RO-FLOOD-SUSCEP) – the candidate (Costache Romulus-Dumitru) was **Project Director**; the **Project Value was 246800 RON** (around 50000 EUR). The Host Institution was Transilvania University of Brașov.
- b. *Multi-hazard low-carbon resilient technologies and multi-scale digital services for a future-proof, sustainable & user-centred built environment – Project Number 10123467*. (Acronym: MULTICARE). **Horizon Europe Programme**. Period: 01/10/2023 – 30/09/2027. – the candidate (Costache Romulus-Dumitru) is **Project Responsible** from the partner Transilvania University of Brașov. The allocated budget for Transilvania University of Brașov is 327128 EUR (around 1635640 RON). The total budget of the Project is 7497153 EUR. The Project Coordinator is Delft University of Technology.
- c. *Multi-hazard low-carbon resilient technologies and multi-scale digital services for a future-proof, sustainable & user-centred built environment (PN-IV-P8-8.1-PRE-HE-ORG-2023-0135)*, contract No. 50PHE from 03/01/2024. Period: 03/01/2024 – 31/12/2025 – the candidate (Costache Romulus-Dumitru) is **Project Director**; the **Project Value is 163560 RON** (around 32700 EUR). The

Host Institution is Transilvania University of Brașov. This project was obtained from UEFICDI within the *Horizon Europe Award Competition - Research Teams 2023* (<https://uefiscdi.gov.ro/premiere-orizont-europa-echipe-de-cercetare>).

10. List of patents filed and accepted, if applicable..

Not applicable

* Se redactează în limba engleză. Prin excepție, redactarea cererii de premiere se face în limba română pentru cererile din domenii cu specific românesc: limba și literatura română și dreptul românesc.

** Rezultatele activității de cercetare sunt evaluate conform Anexei nr. 3 la Regulamentul de organizare și funcționare a programului Gala Cercetării Românești.

PERSONAL INFORMATION

Dr. Romulus-Dumitru Costache

Sex Male | Date of birth 05/06/1989 | Nationality Romanian

WORK EXPERIENCE

03/01/2024 – to date

Project Director**Transilvania University of Brasov, Romania** (<https://www.unitbv.ro/>)*Multi-hazard low-carbon resilient technologies and multi-scale digital services for a future-proof, sustainable & user-centred built environment (PN-IV-P8-8.1-PRE-HE-ORG-2023-0135), contract No. 50PHE from 03/01/2024. Period: 03/01/2024 – 31/12/2025*

Business or sector research

01/10/2023 – to date

Project Responsible**Transilvania University of Brasov, Romania** (<https://www.unitbv.ro/>)*Leading the Transilvania University of Brașov research team in MULTICARE (Multi-hazard low-carbon resilient technologies and multi-scale digital services for a future-proof, sustainable & user-centred built environment) Project. The Project is part of HORIZON EUROPE programme. A number of 2 Work Packages are leaded by the undersigned. Project number 101123467*

Business or sector research

09/03/2023 – to date

Flood hazard assessment expert**Danube Delta National Institute for Research and Development, Romania**(<http://ddni.ro/wps/ro/acasa/>)

- Involved as key expert in the activities regarding the Nucleu Project PN 23 13 02 01 – „Research on the contribution of ecological restoration activities in the management of environmental risks caused by global climate change in the Danube Delta Biosphere Reserve”

Business or sector research

22/02/2023 – 02/06/2023

Associate Professor**Transilvania University of Brasov, Romania** (<https://www.unitbv.ro/>)

- Teaching GIS classes on the Faculty of Civil Engineering, Master Programme (English): Project management in urban regeneration

Business or sector research

01/03/2022 – to date

Socio-economic expert**Danube Delta National Institute for Research and Development, Romania**(<http://ddni.ro/wps/ro/acasa/>)

- Involved in the activities regarding the project *Development of the monitoring station for migratory fish: sturgeon and mackerel - Isaccea (acronym ANADROM)*

Business or sector research

01/12/2019 – to date

Hydrologist ExpertNational Administration “Romanian Waters” (<https://rowater.ro/>)

- Involved in the activities regarding the project - ROFLOODS (*Strengthening the capacity of the central public authority in the field of water for the purpose of implementing the 2nd and 3rd stages of Cycle II of the Flood Directive*) – Cod. SIPOCA 734 Cod MySmis2014 130033.

Domeniu de activitate: research

03/03/2015 – to date

Scientific researcher**National Institute of Hydrology and Water Management, Romania** (www.inhga.ro)

- Involved in the activity of Flash-Flood Forecast and Warning Department. The main activity is

	<p>represented by flash-flood forecast and warning issue. I have also an important contribution in realization of GIS workflows used in the operational activity of the Department.</p> <p>Business or sector research</p>
26/04/2021 – 31/12/2022	<p>Project Manager</p> <p>Transilvania University of Brasov, Romania (https://www.unitbv.ro/)</p> <ul style="list-style-type: none">▪ Leading the RO-FLOOD-SUSCEP Project (Ctr. No. D / 226/2021) on the assessment of susceptibility to floods and floods through artificial intelligence combined with GIS techniques. <p>Business or sector research</p>
26/04/2021 – 31/12/2022	<p>Socio-economic expert</p> <p>Danube Delta National Institute for Research and Development, Romania (http://ddni.ro/wps/ro/acasa/)</p> <ul style="list-style-type: none">▪ Involved in the activities regarding the <i>Project of the Danube Delta Biosphere Reservation Management Plan</i>. <p>Business or sector research</p>
12/10/2021 – 31/08/2022	<p>GIS expert</p> <p>Danube Delta National Institute for Research and Development, Romania (http://ddni.ro/wps/ro/acasa/)</p> <ul style="list-style-type: none">▪ Involved in the activity of contract number 644/.2021/INCDDD – "The assessment of environmental impact for the project "Construction works for the heavy water detritification plant" proposed to be located on the Nuclear Power Plant Platform, Cernavoda City, Constanța County. <p>Business or sector research</p>
01/07/2015 – 01/12/2015	<p>Geographer</p> <p>ESRI Romania, 8, Roma, District 1, Bucharest, Romania, website: http://www.esri.ro/</p> <ul style="list-style-type: none">▪ Digitization and updating the Geodatabase with roads and buildings from different localities of Romania from Orthophotomaps <p>Business or sector IT</p>

RESEARCH ACTIVITY

Project Director

RO-FLOOD-SUSCEP - The integrated analysis of flash-floods and floods susceptibility in Romania using machine learning algorithms and bivariate statistics (PN-III-P1-1.1-PD-2019-0424) – Period: 01/01/2021 – 31/12/2022

Member in project teams

1. **Ro-Risk Project** – advisory and expertise services for flood risk assessment under the Project „Assessing Disaster Risks at National Level” – Period: 21/07.2016 – 31/12/2016 (Project headed by General Inspectorate of Emergency Situation)
2. **MOSES Project** - Managing Crop Water Saving with Enterprise Services – Period 01/09/2016 – 01/11/2018 (Project headed by ESRI Italy)
3. **IS-ENES2 Project** – Infrastructure for the European Network of Earth System Modelling – Period: 01/02/2017 – 31/03/2017

Fellowships

1. Scientific performance fellowship – University of Bucharest

- a. **Project title:** Manifestation potential of hydrological risk phenomena, floods and flooding, across the Subcarpathian sector of Buzău River Basin
- b. **Period:** 01/11/2012 – 30/06/2013

2. Doctoral POSDRU fellowship within SOCERT Project

- a. **Project title:** Assessment of economic damages caused by floods and flooding in the upper and middle sector of Buzău River Basin
- b. **Period:** 01/07/2014 – 30/09/2015

3. Postdoctoral Fellowship – Research Institute of University of Bucharest

- a. **Project title:** GIS tool for flash-flood vulnerability assessment and technical support for hidrological forecast and warning

b. Period: 15/06/2018 – 14/06/2019

4. Postdoctoral Fellowship – Research Institute of University of Bucharest
 - a. Project title: The use of artificial intelligence combined with hydrological and hydraulic modelling for a detailed identification of torrential valleys and river sectors prone to flash-floods
 - b. Period: 01/01/2020 – 31/12/2020

Editorial Board Member

1. Academic Editor – *Advances in Civil Engineering* – Hindawi (Web of Science Impact Factor = 1.924)
2. Academic Editor – *International Journal of RF and Microwave Computer-Aided Engineering* – Wiley Online Library (Web of Science Impact Factor = 1.987)
3. Topic Editor - *Geosciences* – MDPI (included in Emerging Sources Citation Index, SCOPUS CiteFactor: 1.82)
4. Associate Editor – *Frontiers in Remote Sensing* - (Indexed in: 1Science, CLOCKSS, CrossRef, DeepGreen, Dimensions, DOAJ, Figshare, Jisc, MyScienceWork, OpenAIRE, Semantic Scholar, Sherpa/Romeo)
5. Guest Editor for Special Issue in *Water* (MDPI) (I.F.: 2.544, Q2 – Web of Science): *Flash-Flood Susceptibility, Forecast and Warning*
6. Guest Editor for Special Issue in *Geosciences* (MDPI): *Assessment of Natural Risk Phenomena Susceptibility Using Novel Analysis Algorithms Combined with GIS Techniques*
7. Guest Editor for Special Issue in *Land* (MDPI) (I.F.: 3.905, Q2 – Web of Science): *Application of Geographic Information System for Monitoring and Predicting Flash Flood Susceptibility*
8. Editor of *Journal of Mining and Earth Sciences* (Indexed in Crossref, Citation Gateway and Google Scholar).
9. Editor of *Hydrology* – Science Publishing Group (Indexed in WorldCat, Crossref, Zeitschriften Datenbank, etc.)

Scientific Awards

1. 1st place (winner from Romania country side) at “*Danubius Young Scientist Award “2020”* – organized by Austrian Federal Ministry for Education, Science and Research (BMBFW) and the Institute for the Danube Region and Central Europe (IDM).
2. Special Mention at “*Rada Mihalcea Awards - Young Researchers in science and engineering – 6th edition - 2020*” - organized by Cluj-Napoca (Romania) city hall

Scientometric indicators

Apă în condițiile Schimbărilor climatice și ale Modificărilor Antropice, Institutul Național de Hidrologie și Gospodărire a Apelor, 23-26.IX.2013.

15. Remus Prăvălie, Romulus Costache, 2013, *The vulnerability of the territorial-administrative units to the hydrological phenomena of risk (flash-floods). Case study: the subcarpathian sector of Buzău catchment*, Conferința Științifică: Managementul Resurselor de Apă în condițiile Schimbărilor climatice și ale Modificărilor Antropice, Institutul Național de Hidrologie și Gospodărire a Apelor, 23-26.IX.2013.
16. Costache Romulus, Popescu Cristian, 2013, *Utilizarea tehniciilor GIS în analiza fenomenelor hidrice de risc din bazinul hidrografic al râului Sărățel*, Simpozionul Național Studentesc "Mihai David", Universitatea Al. I. Cuza din Iași Facultatea de Geologie și Geografie, Departamentul de Geografie 21-24.XI.2013.
17. Costache Romulus, 2013, *Analiza viitorii din perioada 28-30.V.2012 de pe râul Slănic în zona localității Lopătari*, Workshop-ul Tinerilor Cercetători, Ediția a VIII-a, Academia Română, Institutul de Geografie, București, 5.XII.2013.
18. Costache Romulus, 2013, *Utilizarea tehniciilor GIS pentru determinarea timpului de intarziere și a timpului de concentrare a apei în bazine hidrografice mici. Studiu de caz: bazinul hidrografic Pecineaga*, Workshop-ul Tinerilor Cercetători, Ediția a VIII-a, Academia Română, Institutul de Geografie, București, 5.XII.2013.
19. Costache Romulus, 2014, *Utilizarea integrată a modelării hidrologice și hidraulice. Studiu de caz: Râul Slănic, comuna Lopătari*, Sesiunea de Comunicații Științifice ale studenților doctoranzi din Facultatea de Geografie a Universității din București, 25.X.2014.
20. Andreea-Violeta MANOLACHE, Andreea MIHALCEA, Romulus COSTACHE, 2015, *Analiză comparativă între precipitațiile înregistrate de stațiile hidrometrice și cele estimate pe baza informațiilor radar*, Conferința Științifică Anuală, București, 2-3 Noiembrie, INHGA.
21. Romulus COSTACHE, Liliana ZAHARIA, 2015, *Model GIS de identificare a arealelor pretabile împăduririi în vederea reducerii potențialului surgerii accelerate a apei pe versanți, în bazinul superior și mijlociu al râului Buzău*, Conferința Științifică Anuală, București, 2-3 Noiembrie, INHGA.
